Color In Design

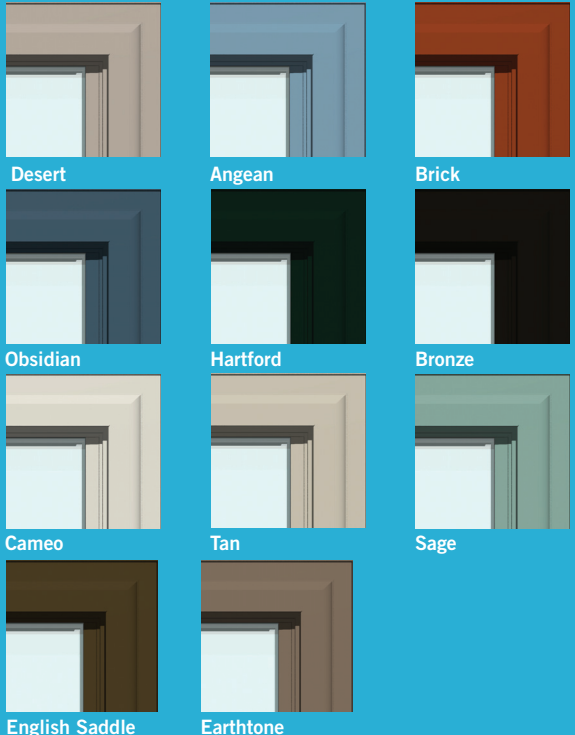

You Pick It.  
We Make It.

Custom colors available  
to match your style and decor.

## Standard Color Options:

Available in White and these amazing colors...

# Explanation of Benefits:

## Vibrant Colors

The Vivid Color™ System offers 11 standard colors and can also create custom colors to reflect your unique vision. Our system leverages high performance, top coat technology that can provide you with brilliantly colored vinyl that won't warp, chip or peel.

## High Performance Treatment

When you choose our high performance, water based coatings, you'll have vinyl that will maintain its beauty and integrity no matter what nature throws at it. No matter what type of climate you live in, our high performance treatments are designed to last.

## Heat Reflective Pigments

All of our coatings utilize reflective pigments that are designed to reflect the heat. Heat reflective pigments make the heat from the sun bounce off the surface of your vinyl, allowing it to maintain a cooler surface temperature and keeping the heat out of your home. Having coatings that reflect the heat will allow you to maintain a more consistent interior temperature and cut your energy costs.

## Low VOC / EPA compliant

NT Window is committed to environmental sustainability. All of our coatings are Low VOC and EPA compliant to ensure limited environmental impact while offering a safe solution for you and your family.

## UV resistance

All of our vinyl colors are UV resistant. We leverage heat reflective pigments and reflective topcoats to keep the heat out of your home and also maintain the color of the treatment by resisting fading from the sun.

## 15 year warranty

NT Window offers a comprehensive 15 year warranty. When you invest with us, we will work with you to ensure the life of your new windows. Your home is your greatest asset and we are committed to helping you maintain its value.

## High color and gloss retention

Our high performance coatings utilize industry leading technology to ensure brilliant colors that maintain their vibrancy and gloss throughout the life of your home.

## Why our system is different

Our coatings are water based, and EPA compliant, ensuring that it will maintain its integrity with limited environmental impact - keeping you and your family safe from unnecessary chemicals.

AAMA approved and ASTM tested, our water based polyurethane paint is the safest high-performance finish you will ever find. You'll enjoy a brilliant color treatment that is heat resistant, energy efficient and colorfast. Our Vivid Color™ Coating System truly offers a fully comprehensive exterior color solution for your home.

Its interesting to note that Vivid Color™ Coatings were developed as a result of working on aircraft projects. These aircraft projects proved to provide valuable lessons about durability and colorfastness in extreme and high pressure conditions. It was this path of innovation that led to utilizing similar technology to create superior color coatings for the home.

# VividColor™ Exteriors

## Color In Design

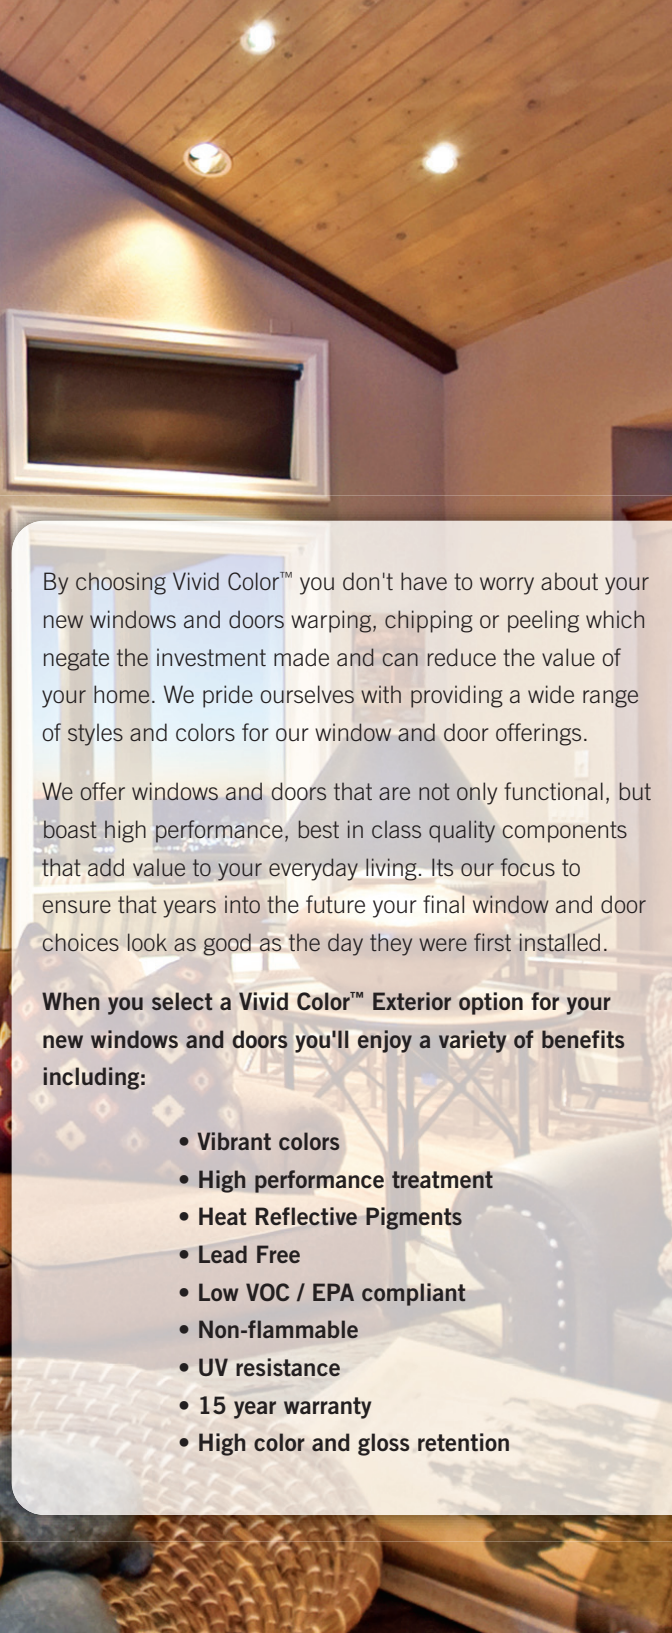

The VividColor™ System is designed to help our clients express their unique style through color. When shopping for vinyl windows and doors, consumers will come upon the standard offerings of white and tan. While these colors may work with many different exterior color selections, they are limiting. We offer 11 standard colors - far more than the typical standard color set provided by vinyl topcoat providers.

More than standard colors, the technology supporting the VividColor™ System allows us to work with you to provide custom color options of your choosing. We can create vinyl coatings that match your individual decor, creating a complete and custom exterior finish. Create lasting curb appeal with a custom color solution from NT Window.

VividColor™ by NT Window offers window and door coatings that come in almost any color of the rainbow giving you endless design choices. Our top coating system is composed of heat reflective pigments that offer brilliant color options while minimizing heat gain. The result is not only aesthetically pleasing but also adds additional energy efficient properties to your windows and doors.

If you take a look at our comprehensive exterior color options you'll quickly notice the vibrant, clear and deep colors our VividColor™ System offers. We not only make certain that the level of quality is high but we also designed the system for durability, and colorfastness all while limiting the impact on the environment. VividColor™ is one of the first color coating systems that offered water-based, high performance coatings in the industry. Along with our high performance window and door products, we're happy to provide you with a time-tested environmentally friendly designer option to revamp the exterior look of your home.

By choosing Vivid Color™ you don't have to worry about your new windows and doors warping, chipping or peeling which negate the investment made and can reduce the value of your home. We pride ourselves with providing a wide range of styles and colors for our window and door offerings.

We offer windows and doors that are not only functional, but boast high performance, best in class quality components that add value to your everyday living. It's our focus to ensure that years into the future your final window and door choices look as good as the day they were first installed.

**When you select a Vivid Color™ Exterior option for your new windows and doors you'll enjoy a variety of benefits including:**

- **Vibrant colors**
- **High performance treatment**
- **Heat Reflective Pigments**
- **Lead Free**
- **Low VOC / EPA compliant**
